

## MAXIMIG 251 AUTO CD

### DIODE BASED

#### SCOPE AND APPLICATIONS:

- Compact MIG/MAG welding outfit.
- Inbuild wire feature for less weight and maintenance free wire drive unit.
- Suitable for heavy duty application specially in auto fabrication industries.

#### SALIENT FEATURES:

- Specifically designed for auto ancillaries for productive and quality welds in a variety of components like load body, fuel tank supports, engine bracket for two wheelers and sheet metal components upto 2mm thick.
- User friendly features like pre-weld selection of OCV from the chart on the front panel and gas flow rate to ensure zero defect GMAW welding.
- Dependable thyristorised wire feeding system with quick change type mechanism ensures long uninterrupted defect-free welding.
- Lightweight and ergonomically designed swivelling handle, reduces operator fatigue and increases productivity.
- MAXIMIG series power sources are reliable workhorses with high mean time between failures.
