

(SMAW) (Shielded Metal Arc Welding) AC ARC WELDERS

E-WELMAC - 150/E-WELMAC - 190

SCOPE AND APPLICATIONS:

- Ensures smooth and uninterrupted arc resulting in dependable welding.
- Welder friendly. Offers higher metal recovery due to less spatter.
- Ensures fine control of welding current to minimise the heat input to the job which reduces HAZ.
- Saves electrical energy while the equipment is not in use, due to losses.
- Can be conveniently used at the workplace.

SALIENT FEATURES:

- Reliable. Dynamic output characteristics throughout the entire welding range.
- Infinitely variable current regulation through sturdy and smooth moving core mechanism.
- Adjustment of welding current is possible while welding is in progress.
- Transformers with Natural Air cooling.
- Power On/Off switch.
- Compact and lightweight.
