

RANGER MULTI 600

MULTI PROCESS CAPABILITY

SCOPE AND APPLICATIONS:

- Multi Process Capability suitable for MIG / MAG, MMA, Gouging and TIG welding with suitable HF unit.
- Built with Proven Thyristorised Technology.
- Rugged Construction for heavy-duty site / workshop welding.

SALIENT FEATURES:

- Stepless variation of voltage and current (CV), Current (CC) through lightweight remote control unit - enable easy parameter setting at the welding point.
- Arc Force Control Potentiometer enables easy ARC striking in MMA welding with all types of electrodes.
- Suitable for Welding with Open Arc -type wire feeder.
- Available in six combinations of MIG/MAG outfit, covering all varieties of MIG/MAG welding applications of solid M S & Stainless Steel wires, Flux cored wires, Aluminium wires etc. Options of 2/4 Roll Wire Feeder units, including option of Heavy Duty Wire Feeder unit suitable for heavy duty (1.6 - 2.4 dia wire) MIG / MAG applications.
- Quick Release Wire Feed Roller Mechanism enables operator to change the wire spool quickly, minimizing the unproductive time and thus increasing the productivity on the shop floor.
