

SILENT CHALLENGER SERIES

DIESEL ENGINE DRIVEN SILENT WELDING SETS 300 AMPS, 400 AMPS, 500 AMPS CAPACITY

SCOPE AND APPLICATIONS:

- Conforming to latest CPCB norms for noise & exhaust emission level.
- Versatile applications, including cross country, inplant pipe and tube welding.
- Ideal for heavy fabrication & site applications.
- Highly reliable even in hostile site conditions.
- Big savings in fuel and longer runs before next refueling.
- Excellent Pre and Post Sales Services.

SALIENT FEATURES:

- Specially proven with Cellulosic (6010 & 7018 types) and other special types of electrodes.
- Super Silent Operation.
- Efficient Brushless Welding Generator.
- Single bearing welding generator coupled to Diesel Engine with flexible non corrosive metallic coupling which last for full life time of set.
